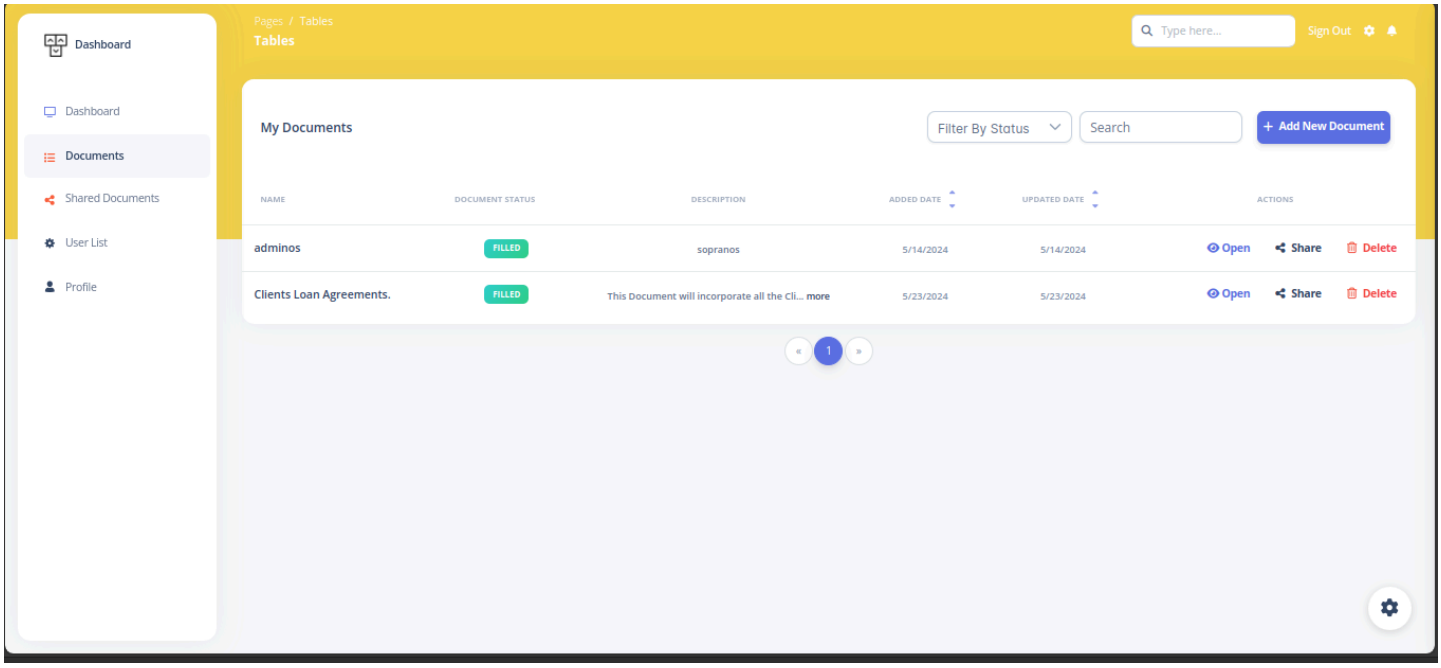
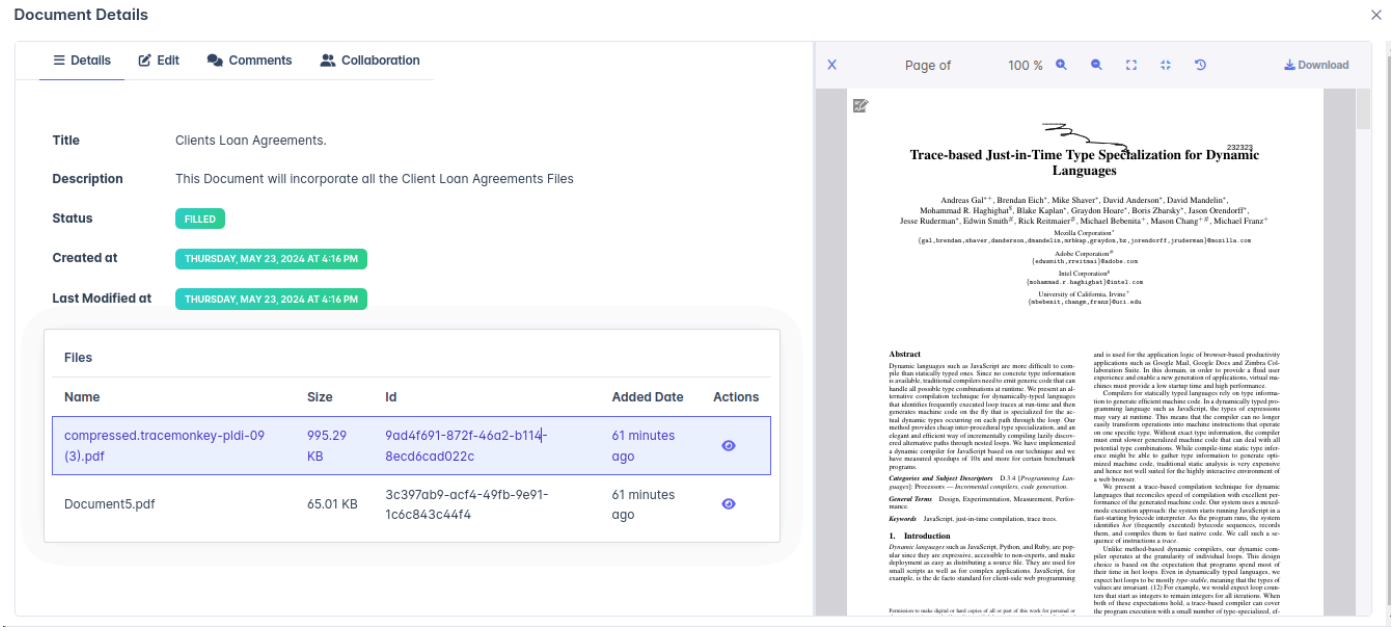
Document digitization solution for companies that need to store, search, and manage large amounts of paperwork.

I hope the following Screenshots help you understand this work better initially.

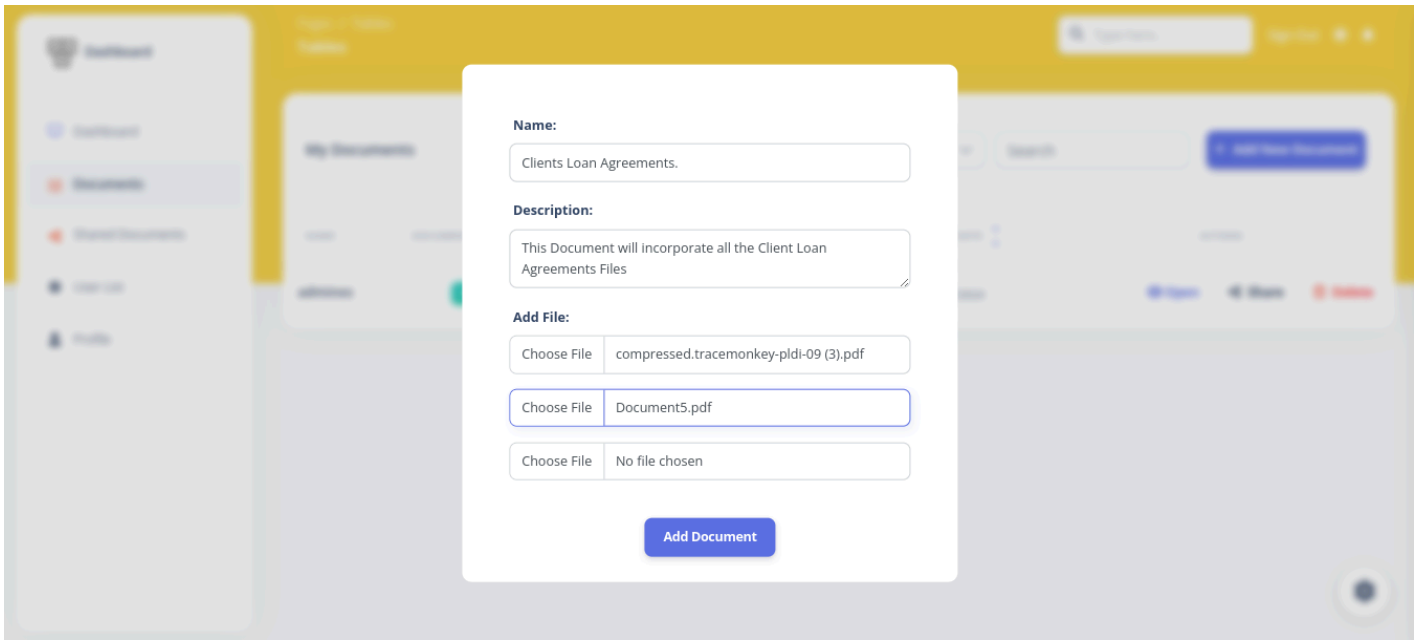
- Personal Documents Interface



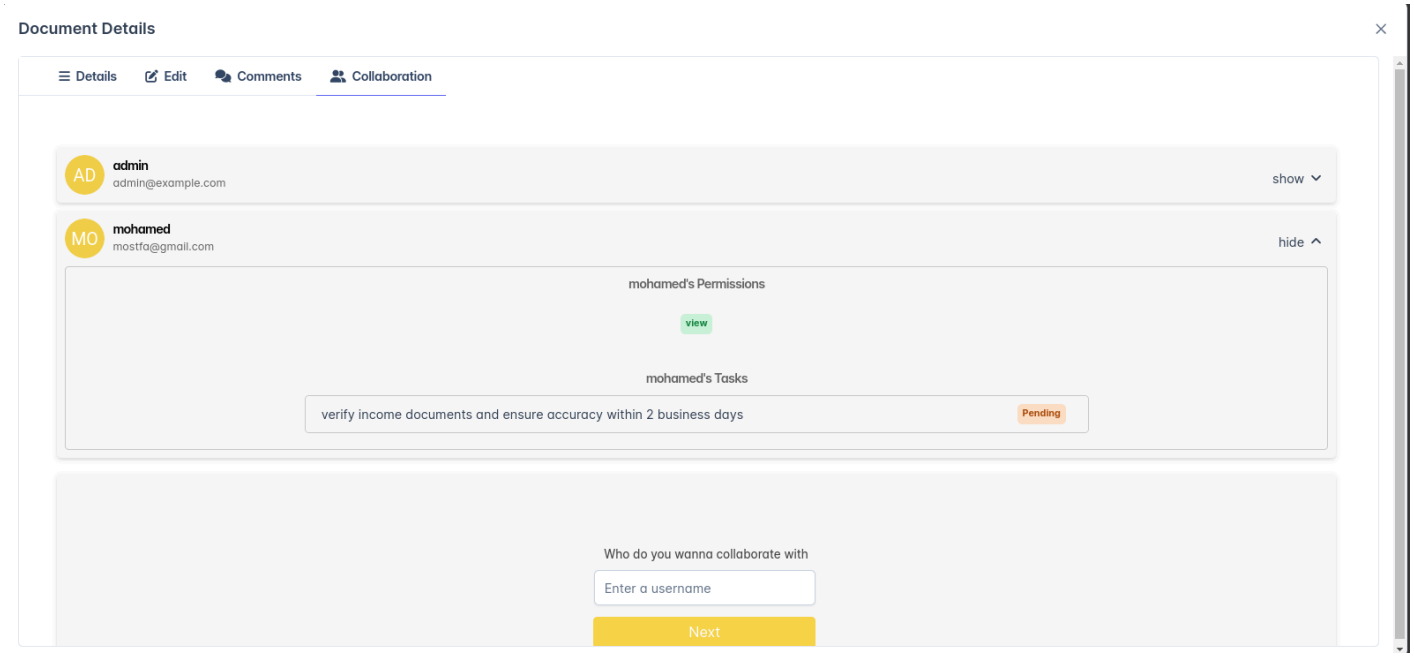
- Document Details Interface



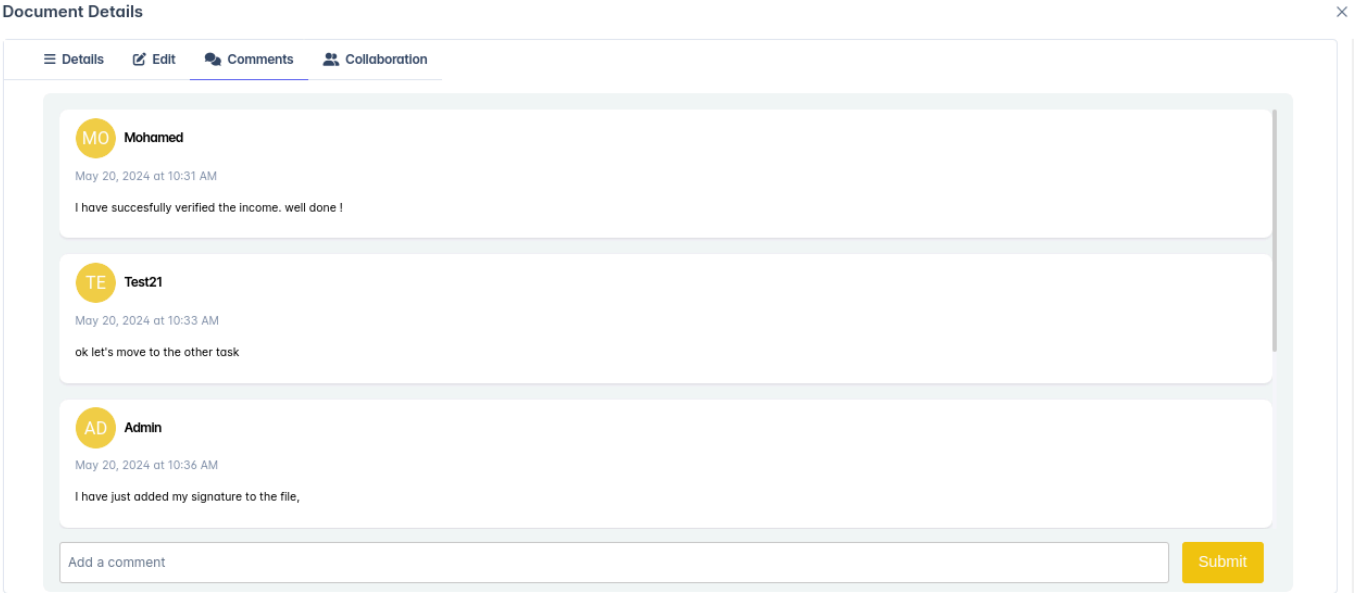
- Interface for Adding a new Document



- Collaboration and inviting new members so they can have access to a certain document. All this with tasks and certain permissions (view, edit,share, etc)

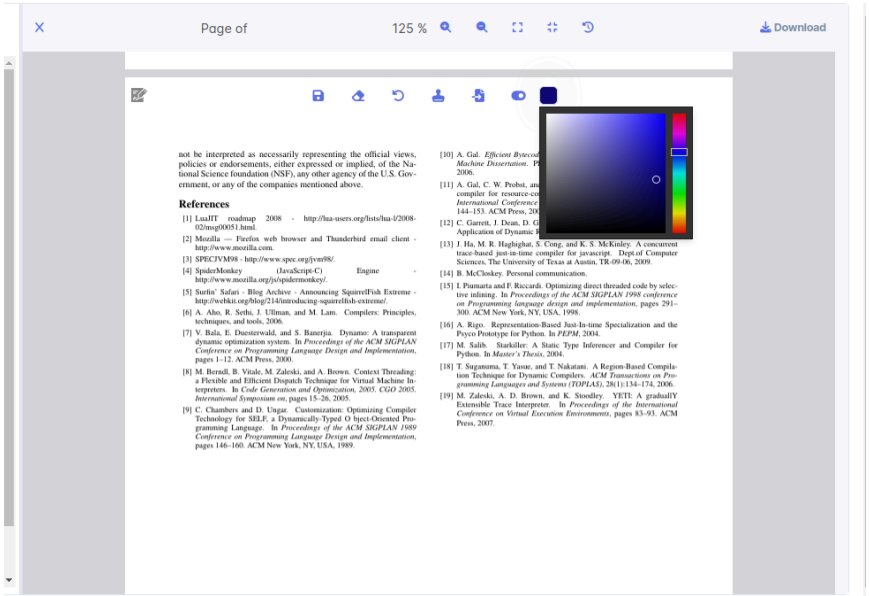


- Interface for adding a comment to highlight something you noticed

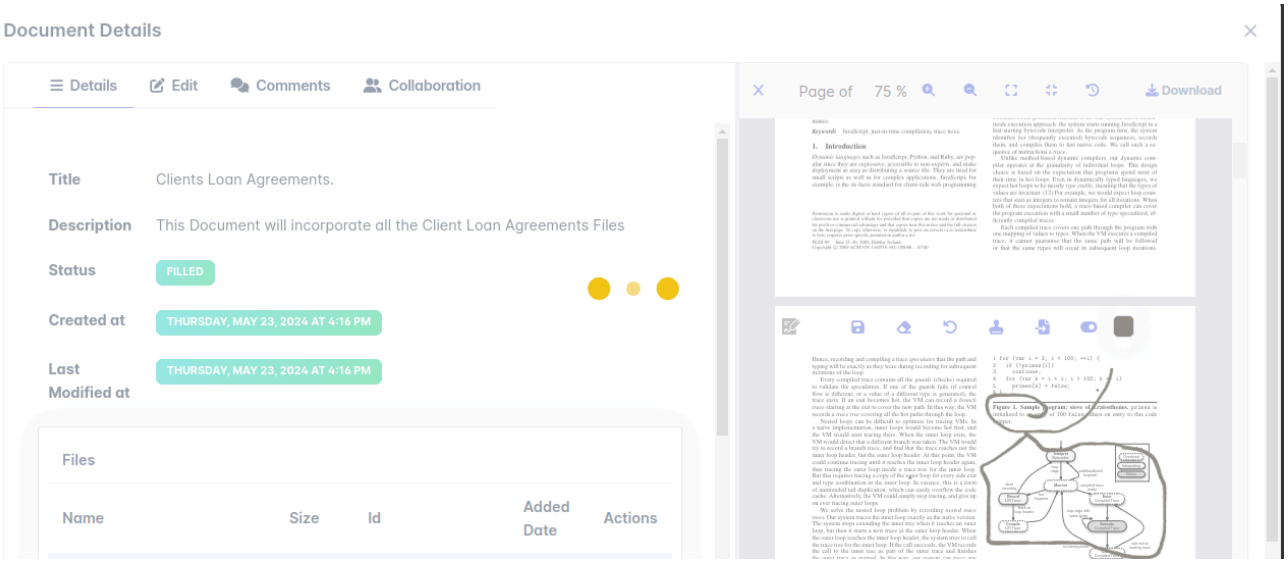


The following Screenshot highlights the Annotations feature for Annotating a pdf file directly in the platform.

1- Pick a color



2- Perform Annotation and let it pending



Thank you ! I hope you enjoyed taking a tour at this project, check other work.
